Re: Proposal of Engineering Services
Hopkins Road Storm Drain Improvement Plans

Ms. Garver:

We understand the referenced project request is to prepare a set of buildable plans for the replacement of storm drainage under Hopkins Road as discussed between Croy and City staff. A more detailed project-specific description and Scope of Services is as follows:

PROJECT DESCRIPTION

The storm drainage crossing Hopkins Road is CMP that has material loss and needs replacement. Additionally, on the east side of Hopkins Road a sanitary and gas line intercept the existing inlet structure. The project is to replace the existing CMP pipes and structures, for a more desirable layout in relation all the existing utilities.

SCOPE OF SERVICES

We will prepare a set of buildable plans for contractors to construct the project. The plans will implement the following repairs:

- Replace upstream pipe from headwall to under the road with RCP to meet existing hydraulic capacity. We will determine capacity of existing pipe to determine new pipe size.
- Replace the inlet structure on the west side of Hopkins Road with a deeper invert out to be below the existing utilities.
- Replace a portion of the existing pipe downstream of new inlet structure at a determined point on the pipe with a manhole and remove the old pipe.

We anticipate the set of plans to include the following drawings:

Existing Conditions/Demolition Plan, Grading and Drainage Plan, Erosion Control Plan
Detail Sheet(s)

Proposed Budget: \$4,000.00

Invoicing

This work will be completed as an hourly not to exceed fee project. Invoicing will be progressive and will be submitted monthly for work completed to date less previous payments.

This proposal incorporates, as if fully set forth herein, the terms and conditions of the Professional Services Agreement for Engineering Services dated February 14, 2020, between City of Powder Springs and Croy Engineering, LLC as established for Stormwater Supervisor services. If this proposal is acceptable to you, please sign below indicating your approval and return (1) signed copy for our files. A signed copy of this letter will serve as Croy Engineering's Notice to Proceed.

Again, we thank you for the request. If you have any questions, please do not hesitate to contact us. We look forward to working with you on this project.

Respectfully,

Croy Engineering, LLC
