CALLBACK COVERAGE

Service dispatching will take place through our Schindler Customer Service Network (SCSN), which is staffed by qualified Schindler personnel, 24/7. You will be provided with a customer identification number, which must be referenced when a call is placed for your facility. Our dispatchers will have access to your building's service call records, and will promptly relay the details of your call to the assigned technician.

Schindler shall provide emergency minor adjustment callbacks during regular working hours. If you authorize callbacks outside regular working hours, you will pay us at our standard billing rates, plus materials not covered by contract, expenses and travel. All other work outside the services will be billed at our standard billing rates. A request for service will be considered an "emergency minor adjustment callback" if it is to correct a malfunction or adjust the equipment and requires immediate attention and is not caused by misuse, abuse or other factors beyond our control. The term does not include any correction or adjustment that requires more than one technician or more than two hours to complete.

REPAIRS

As conditions, usage, or as ASME code dictate, Schindler shall repair or replace the Covered Components. Replacements for the Covered Components are available either at a local Schindler location, at our national Service Distribution Center, or within our network of Schindler approved, third-party suppliers.

TESTING OF SAFETY DEVICES

Equipment	Test	Frequency
96001051354	CAT 1	Annually
96001051354	CAT 5	Every 5 Years

Our testing responsibilities do not include fees or changes imposed by local authorities in conjunction with witnessing, witnessing costs, inspecting, assisting inspection authorities, licensing or testing the Equipment including observation of testing by 3rd parties; changes in the testing requirements after the initial start date of this Agreement, or any other testing obligations other than as specifically set forth above, including, but not limited to seismic tests. Since these tests may expose the equipment to strains well in excess of those experienced during normal operation, Schindler will not be responsible for any damage to the equipment or property, or injury to or death of any persons, resulting from or arising out of the performance of these tests. Further, our testing responsibilities do not include performance, or the keeping of records related to, monthly firefighters service.

HOURS OF SERVICE

Schindler

Unless otherwise noted above, all work shall be completed during our regular working hours of regular working days, excluding elevator trade holidays.

SCHINDLER AHEAD

Schindler Ahead is a digital closed-loop system which, via a dedicated wireless cellular signal, provides remote connectivity between your Equipment and Schindler, allowing us to be notified 24/7 if any connected component or function is operating outside established parameters. Schindler Ahead can help improve your Equipment reliability, provide you with deeper insights, superior convenience, and greater cost control.

Schindler will make every reasonable effort to maintain wireless connectivity. If requested, you will provide the proper wiring diagrams for the equipment covered. These diagrams will remain your property and will be maintained by Schindler for use in troubleshooting and servicing the equipment.

Schindler Ahead, your Subscription package, and the digital services described in this agreement require Schindler Ahead Connectivity. If your existing unit(s) are not equipped with the Connectivity to enable the selected services, we will provide a separate invoice for \$2,000 per unit for this cost. By signing this agreement, you agree to pay the costs associated with this activation. Work shall be performed during our regular working hours of our regular working days and will utilize existing elevator wiring. Title to Hardware remains with Schindler. Schindler may replace or modify Hardware at any time. Customer shall promptly provide Schindler access to Hardware and prevent unauthorized access thereto.

This Agreement does not include Schindler Ahead.

If you would like information on upgrading your Core package, please discuss with your sales rep. The upgraded packages are:

Connect – The Connect package includes 24/7 monitoring of your Equipment, which allows for real-time visibility of Equipment operating status, and select operating parameters, on the Schindler ActionBoard (web portal) and ActionBoard Mobile (phone application) platforms. Performance history, reliability data, and many other customizable reports and features, are available on the ActionBoard platforms.

_____ Initial Here to add Connect for \$20 per unit, per month in addition to the subscription price shown in the Price section below

Enhanced – The Enhanced package includes 24/7 monitoring of your Equipment, which allows for real-time visibility of Equipment operating status, and select operating parameters, on the Schindler ActionBoard (web portal) and ActionBoard Mobile (phone application) platforms. Performance history, reliability data, and many other customizable reports and features, are available on the ActionBoard platforms. Additionally, Enhanced customers receive access to Schindler's Elevated Support Professional (ESP) Team. This team analyzes information gathered by Schindler Ahead, which can help reduce equipment downtime in a shutdown situation by performing advanced troubleshooting and can help improve equipment reliability in non-shutdown situations, by scheduling future maintenance on components necessitating it. When appropriate, the ESP Team will communicate with you to schedule service calls. With these enhanced diagnostics, we can guarantee that you will not be charged for Running on Arrival (ROA) calls. Schindler will fully cover the cost of any callback during regular hours related to the following situations: Elevator or Escalator Running in normal operation or running under any of the following special services modes: Independent service, Fireman's service (Phase I or Phase II), or Inspection operation. All other callbacks will be billed as outlined in the agreement.

Schindler

SafeCall – The Schindler Ahead in-car emergency phone service will be added to your digital package. This service includes a cellular connection between your elevator's in-car emergency phone and our Schindler Customer Service Network (SCSN), that handles incoming and outgoing emergency calls with passengers in the elevator. To ensure reliability, Schindler Ahead phone service also provides monitoring of this connection. The availability of this service is contingent upon code approval by the local Authority Having Jurisdiction (AHJ) and having a non-proprietary in-car emergency phone. If selected, please await confirmation of the activation of the service prior to terminating your existing dedicated phone line, to avoid a disruption in service.

_____ Initial Here to add SafeCall for \$40 per unit, per month in addition to the subscription price shown in the Price section below

Visual Alarm Module (VAM) Monitoring – In areas where the local Authority Having Jurisdiction (AHJ) has adopted ASME A17.1-2019 code regarding communication systems for the hearing and speech impaired, Schindler shall provide voice, audio, and text-based communications to the elevator cab. This code requirement is in supplement to the elevator's in-car emergency phone. To enable this service, the necessary hardware to enable communication must be installed, which is subject to an additional one-time charge, if not already present.

_____ Initial Here to add VAM for \$45 per unit, per month in addition to the subscription price shown in the Price section below

The packages above are dependent upon applicable equipment type and hardware installation, which will be installed at the owner's expense. Please contact your Schindler Rep for more information.
