Powder Springs, GA 30127

RE: RFP 24-006 Raised Curb Channelizing Systems for Railroad Quiet Zone

Dear Ms. Axt:

This letter serves as our intent to supply you with the QWICK KURB® channelizing system for the above RFP. We have been the distributor for QWICK KURB®, INC. in Florida, Georgia and Illinois since 2005.

Ted Parson, Vice President, would be your point of contact for this RFP. His direct cell phone number is [REDACTED] and email is [REDACTED]

Cloverleaf Corporation has been in business since 1996 selling traffic control and highway safety products. Our main office is located at 1916 South Tamiami Trail, Ruskin, FL 33570 with a satellite warehouse at 588 Cochran Highway, Hawkinsville, GA 31036. We would ship the QWICK KURB from our main Florida facility. We employ ten employees in Florida and one in our Georgia warehouse.

The QWICK KURB® system has had over 20 years of on the road experience. QWICK KURB® was first used at a highway-rail grade crossing in 1998 in North Carolina as part of a Federal Railroad Administration (FRA) research project on the effectiveness of various roadway safety measures to deter gate running. The effectiveness of these devices as determined by this project became the basis for the Supplemental Safety Measures (SSM) which are mentioned in FRA's Use of Locomotive Horns at Highway-Rail Grade Crossings (i.e. Quiet Zone rule). Additionally, FRA published a guide document in 2010 entitled "Use of Traffic Channelization Devices at Highway-Rail Grade Crossings" which featured photos of the QWICK KURB® product in use at these test sites.

Cloverleaf has extensive experience selling this product for quiet zone applications. We have assisted over 20 communities in establishing quiet zones using the QWICK KURB® system. Below are three references, including one from Georgia:

CLOVERLEAF CORPORATION

City of Effingham
Jeremy D. Heurman, P.E.
Director of Public Works

Village of New Lexon
Will Nash
City Civil Engineer

For your project, we will supply you with four runs of 100' of QWICK KURB channelizing system including L104 MEGA-MARKERS at 6.7' on center (max allowable for Quiet Zone applications is 7' on center spacing for delineators). The total quantities for the project are as follows:

L60Y	124 EA	Yellow QWICK KURB Raised Separator Units
L61Y	4 EA	Yellow QWICK KURB Male End Units
L62Y	4 EA	Yellow QWICK KURB Female End Units
L65Y	132 EA	Yellow QWICK KURB Reflective Arcs
L104	64 EA	MEGA-MARKER w/ flex & bar, Black/Yellow Stripes both sides

All required anchoring hardware for the MEGA-MARKERS and Separator units is included.

We look forward to working with the City of Powder Springs on their Quiet Zone project.

Sincerely,

Michelle Schindler
President
