

## McEachern High School

*"Higher Levels of Learning for All"*

August 14, 2020

Dear Prospective Partner,

The purpose of this letter is to invite you to partner with the McEachern High School STEM program. We are in Powder Springs, Georgia and seek STEM organizations to partner with us to expose our students to real world applications of their content knowledge. Our vision is to equip our students with the inquiry skills that will allow them to identify, research, and address critical problems, issues, and needs of the future. We will inspire our students to explore, implement, and evaluate the innovative solutions that lead to human progress. Our area of focus in STEM include the Biomedical Sciences and Engineering. McEachern STEM students will competently, fearlessly, and passionately take on the challenges of an ever-changing world; which will lead to their enhancement and enrichment of the lives of others.

We recognize your organization as a leader in the STEM community and one who desires to give back. Our request is that you provide the following opportunities for students in our program to enhance their educational experience:

- Classroom visits and mentoring activities
- Internship Opportunities for students
- Externship Opportunities for teachers
- Sponsorships to assist with program costs and supplies
- Field trips to STEM organizations

We hope that you will agree in partnering with the McEachern High School STEM program. We look forward to your support and hope to speak with you soon.

Thank you in advance for your time and consideration.

Krystal Wattley
