Identity of the work is achievable
2. Develop a Design Role's and Responsibilities
3. Resource Availability and Management

Example:
1. Identify the project and its goals.
2. Determine the resources needed to complete the project.
3. Develop a plan for how the resources will be used.
4. Implement the plan.
5. Monitor the progress of the project.
6. Evaluate the results of the project.
7. Report on the progress of the project.
8. Close the project.
